

Product Name: (Provisional) *ClassDiaspora*

Target Users:

- **Teachers in Nigeria** seeking extra income by offering online lessons
- **Parents (mainly Nigerians abroad)** looking for affordable, culturally aligned online tutors for their children

🔍 Problem Statement

There is no unified, trusted platform where Nigerian teachers can easily connect with parents abroad looking for qualified tutors to teach their children online in core subjects and cultural education.

🎯 Goals and Objectives

- Enable **teachers** to register, upload bio, subjects, schedules, pricing, and curriculum
 - Allow **parents** to browse/search teachers by subject, availability, location, and reviews
 - Provide **direct contact or request feature** for seamless connection
 - Offer basic **admin tools** for moderation, onboarding, and platform monitoring
-

📋 Core Features

1. Teacher Module

- Register/Login
- Complete profile with:
 - Full name, passport photo, qualifications
 - Bio, subjects taught, class levels (e.g., Basic 1–6, JSS, SS)
 - Availability schedule
 - Rate per session/hour/week
 - Upload lesson plan sample (PDF or editable form)
- Social links (optional)
- Curriculum upload section (categorized)
- Dashboard:
 - View profile
 - Edit content
 - Message center (optional)

2. Parent Module

- Search teachers by filters:
 - Subject, level, availability, language, location
- View teacher profiles (public-facing info)
- Contact teacher via direct message / inquiry form
- Save/bookmark teacher profiles
- Optional: “Request a Teacher” form

3. Admin Module

- View/manage teachers and users
 - Approve new teacher profiles
 - Flag/report feature management
 - View analytics (registrations, contacts made)
-

Platforms

- **Web App (Mobile-First Responsive Design)**
 - Later scale to PWA / Native App (optional)
-

Tech Stack (Recommended for MVP)

- Native PHP (with MySQLi)
 - HTML5, Tailwind CSS / Bootstrap
 - Vanilla JavaScript + Ajax for UI interactivity
 - JSON for profile/curriculum handling
 - SMTP or WhatsApp for contact requests
-

Monetization Ideas

- Freemium listing: free basic profiles, premium features (top listing, direct booking, etc.)
- Commission per lead or subscription by teachers
- Ad slots or partnerships with ed-tech brands

App Flow Document

1. User Onboarding

- Teacher clicks “Register as a Teacher” → Fill form → Email verification (optional) → Dashboard setup
 - Parent clicks “Find a Teacher” → Browse or register for personalized experience
-

2. Teacher Dashboard Flow

- **Profile Setup → Subject/Class Selection → Curriculum Upload → Availability Schedule → Set Rates → Publish**
 - **Dashboard Home** shows stats, views, messages
 - **Edit Profile & Manage Curriculum**
-

3. Parent Interaction Flow

- Open homepage → Use filters to search teacher → Click on teacher card → View full profile → Click **“Contact Now”** or **“Book Lesson”** → Fill contact form (sent to teacher’s dashboard/email)
-

4. Admin Flow

- Admin login → View pending teacher profiles → Approve/Reject
- View flagged profiles → Take action
- Moderate contact forms / messages (if enabled)

Tech Stack

Backend

- **Language:** PHP (Native, no frameworks)
- **Database:** MySQLi (Structured schema for teachers, parents, lessons)
- **Storage:** File system for document uploads (e.g., lesson plans), optional CDN later
- **APIs:** Custom RESTful PHP APIs using JSON
- **Authentication:** PHP sessions (JWT optional for PWA/SPA needs)

Frontend

- **HTML5 / CSS3**
- **Tailwind CSS** (lightweight, utility-first)
- **Bootstrap CSS** (optional fallback)
- **JavaScript (Vanilla)** for interactivity
- **Ajax** for dynamic content updates without page reloads

Messaging / Notifications

- **PHPMailer** or native PHP mail() for form submissions
- **Optional:** WhatsApp click-to-message or Chat Widget Integration

File Uploads

- Teachers upload curriculum as PDF or DOC (with validation and file size limits)
-

Structure

- Use header.php, footer.php, navbar.php for layout consistency
- Mobile-first layout using Tailwind CSS
- Use fetch() or XMLHttpRequest + Ajax for contact forms and dynamic loads

Dynamic UI

- Live search filters using Ajax (/api/teachers.php?subject=English)
- Use modals or expandable cards to preview curriculum
- Form validation (JS + HTML5)

Security

- Input sanitization using JavaScript
 - Use CSRF tokens in sensitive forms (if needed)
 - File upload: Validate file type/size client-side before sending
-

Backend Development Guidelines

File Structure

```
pgsql
CopyEdit
/api/
  register-teacher.php
  login.php
  teachers.php
  contact-teacher.php
  upload-curriculum.php
/dashboard/
  index.php
  profile.php
  upload.php
/includes/
  db_connect.php
  auth.php
  functions.php
/public/
  index.php
  find-teachers.php
  contact.php
```

Coding Standards

- Use prepared statements with MySQLi (no raw queries)
- Separate logic and presentation (include files for DB, auth, etc.)
- Use session_start() and basic auth middleware (auth.php)

Security

- Escape all outputs (htmlspecialchars)
- Validate and sanitize all inputs
- Limit file uploads to PDF, DOCX with max 2MB

Suggested Tools

Need	Tool
File Compression	PDF.js (frontend) or Zip before upload
Date & Time	date() and strtotime()
Charts (Admin stats)	Chart.js
OTP/Verification (optional)	Email (PHPMailer), or WhatsApp API
